Winter Care for Horses

Cold weather presents horses with some specific nutritional and management demands. As winter approaches it is a good idea to evaluate horses, housing and feeding programs to insure that horses get through the cold weather in good shape.

The Purina Difference

[Click here](#) (PDF) to read how two very different horses each found success through Purina horse feeds.

New Equine Senior® Active Healthy Edge® Horse Feed

Ambassador Spotlight

Kerry Kuhn

Kerry Kuhn has devoted his career to helping people better understand their horses — and horses better understand their riders.

Kerry's 'Practical Horsemanship' program has helped thousands of people across the country get the most out of their relationships with their horses by teaching them useful horsemanship skills they can understand and apply.

[Continue Reading](#)

Because not all senior horses require a complete feed with roughage built in, Purina introduces a feed specifically designed for the active, aging horse that still has the ability to effectively chew and digest forage.
